VITA-AGE® SKIN UP is the new foundation developed by Bottega di Lungavita, with an extraordinary skin feel based on a **Patent Formula** with an immunoprotective, rebalancing and normalizing action on the skin microbiota based on probiotics, hyaluronic acid and softening botanical extracts.

A real formula evolution that's blends a not heavy, natural, soothing skin feel with the color coverage necessary to even out the skin tone and to smooth the skin discolorations.

It is much more than a foundation and much more than an anti-aging treatment. The new patented formula has the advantage of supporting the qualitative and quantitative composition of the normal skin microflora, which is responsible for a delicate chemical-physical balance. It offers immediate moisturizing, soothing and restorative action, it does not damage the optimal pH balance, it avoids the thinning of the lipid barrier and normalizes the altered composition of fatty acids.

The **mix of probiotics** contained in the foundation have shown a **promising role in dermatology** as they can interact with the host's skin microbiome and modulate the protective response, giving health benefits to the epidermis. **Hyaluronic acid** with high molecular weight, **Mallow** phytotherapeutic extracts, **Altea** titrated in protective and soothing mucilages, **Rosehip rich in Vitamin C** and **latest generation luminous mineral pigments**, allow to obtain a real anti-aging moisturizing and rebalancing treatment with a naturalness of 99%.

The result?

A product with a surprising sensoriality. A fresh, covering, luminous, anti-aging foundation, suitable for all skin types, even the most sensitive and problematic, due to the high tolerability and naturalness of its ingredients.

Delicate fragrance.

DIRECTION

Apply a small quantity of product on the face, with a brush or a beauty sponge, blending it towards the neck.

TECHNICAL NOTES

Formula free from: • Parabens • Petrolatum • Allergens • PEG • Alcohol • Silicones

Dermatologically tested

Natural effect available in three shades: • Ivory (Light) • Sand (Medium) • Amber (Dark) - Comfortable texture

USEFUL FOR:

- 1 Cover imperfections. Beneficial immune protective action on the face
- 2 Moisturizing, nourishing and elasticizing the tissues
- 3 Brightening and balancing the complexion
